Summary

Website: <https://educintra.dev/>
Github: <https://github.com/EduCintraBR>

Bachelor in Information Systems from Libertas Faculdades Integradas, I am a fullstack developer with over six years of experience in .NET Core and Angular, currently working at NTT DATA Services. I specialize in legacy system migration, RESTful API development, and dynamic frontend integration.

I have solid knowledge in C#, with significant experience in projects using VB6 and Delphi. My career includes work with Oracle, MySQL, and SQL Server databases, as well as practices in agile methodologies (Scrum and Kanban) and CI/CD tools such as Azure DevOps and Gitlab CI/CD. I am committed to innovation and quality, value continuous learning, and teamwork.

Experience

.NET Developer

NTT DATA Services

Oct 2023 - Present (5 months)

As a Software Developer at Ntt Data Business Solutions, I specialize in .NET Framework and .NET Core development, with expertise in integrating Angular for dynamic front-end experiences and implementing RESTful APIs for seamless data communication. I have a proven track record in migrating legacy systems to modern solutions, ensuring minimal disruption and maximum efficiency. With a strong focus on testing and quality assurance, I am committed to delivering reliable software solutions. Experienced in Agile methodologies, I am dedicated to driving success for our clients in the electric utility sector.

- Proficient in .NET Framework and .NET Core development.
- Expertise in integrating Angular for enhanced front-end experiences.
- Skilled in implementing RESTful APIs for seamless data communication.
- Proven track record in migrating legacy systems to modern solutions.
- Strong focus on testing and quality assurance to ensure reliability.
- Experience with Agile methodologies, including Scrum and Kanban.
- Use of TFS and Github as code versioner.

Full Stack Developer

Meta

Aug 2022 - Oct 2023 (1 year 3 months)

As a dedicated Software Developer at Meta, I specialize in designing and building robust applications for government clients, utilizing technologies like .NET Core 7 and 6, Angular, RESTful APIs, Entity Framework, and Dapper. My expertise extends to migrating legacy systems, such as ASP.NET Classic, and Visual Basic 6, into modern, maintainable solutions. With a focus on both back-end and front-end development, I create sleek and user-friendly interfaces using Angular and craft efficient RESTful APIs to

enable seamless data exchange. My commitment to code reliability is demonstrated through rigorous MSTest unit testing. Additionally, I oversee deployment processes with Azure DevOps and employ Agile methodologies, including Scrum and Kanban, to efficiently manage tasks and sprints.

- Expertise in migrating legacy systems (ASP.NET Classic, VB.NET, VB6) to modern solutions.
- Strong focus on reliable code through MSTest unit testing.
- Efficiently manage deployments with Azure DevOps.
- Agile practitioner using Scrum and Kanban methodologies

NET Developer

Grupo Telluria

Sep 2020 - Aug 2022 (2 years)

I have extensive experience in multiple integration projects utilizing .NET, where I collaborated with various tools, including Zendesk, Salesforce and Zoho Analytics. My role was pivotal in automating integration processes through CI/CD, streamlining workflows, and ensuring data integrity. I was responsible for maintaining and developing new internal integrations among the company's internal tools. Additionally, I made significant contributions to existing internal projects using Angular/Typescript and .NET Core, while also integrating RESTful APIs developed in .NET Core with legacy projects that utilized Visual Basic 6.

- Development of projects, integrations, and APIs using .NET.
- Maintenance of legacy projects in NET Framework 4 and VB6.
- Proficient in using Entity Framework or Dapper. Experience with Docker and LXC containerization.
- Orchestration and Management of API's tasks with Hangfire.
- Gitlab CI/CD continuous integration and deployment.
- Involved in internal projects utilizing Angular/Typescript.
- Integration experience with Zendesk and Salesforce.
- Agile methodology (Scrum and Kanban)

Education

Libertas Faculdades Integradas

Bachelor's degree, Information Systems

2016 – 2019

UNOPAR – Universidade Norte do Paraná

Pos-graduated degree, Software Architecture

2024 – 2024
