

Eduardo Cintra

[Senior Full-Stack Engineer | .NET, React & Angular | Cloud Architectures]

Location: São Sebastião do Paraíso, Minas Gerais, Brazil | **Phone:** +55 35 988113508 | **Email:**

educintra.dev@gmail.com

LinkedIn: <https://www.linkedin.com/in/educintrabr/> | **Portfólio:** <https://educintra.dev>

PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with over 7 years of experience designing, architecting, and modernizing highly scalable enterprise applications. Expert in building robust backend microservices with C# and .NET (6/8/10), seamlessly integrated with dynamic frontend applications using React, Next.js, and Angular. Proven track record in leading cloud migrations (AWS/Azure), implementing event-driven architectures, and enforcing rigorous code quality through TDD and SOLID principles. Recently focused on integrating Generative AI (LLMs, Agents, MCP) into corporate workflows to drive business value and operational efficiency. Fluent in English (C1) and highly adapted to international, remote-first environments.

CORE SKILLS

Backend Development: C#, .NET Core / .NET (6, 8, 10), ASP.NET MVC, RESTful APIs, Entity Framework, Node.js, Microservices Architecture.

Frontend Development: React, Next.js, Angular (v8+), TypeScript, JavaScript, HTML/CSS, Tailwind CSS.

Cloud & DevOps: AWS (S3, EKS), Azure (PaaS, App Services), Docker, Kubernetes, CI/CD (GitHub Actions, Azure DevOps, GitLab).

Architecture & Data: SQL Server, Oracle PL/SQL, Cosmos DB, Kafka, RabbitMQ, Event-Driven Architecture, Clean Architecture, TDD (xUnit, MSTest).

Modernization & AI: Legacy System Migration (.NET Framework/VB6 to Cloud-Native), Generative AI Integrations, Open AI Services, MCP Servers.

PROFESSIONAL EXPERIENCE

Fullstack Developer

Nava - Technology for Business, São Paulo, BR – Remote

10/2025 - Present

Core Responsibilities:

- Architect and engineer high-availability financial solutions for the banking sector, utilizing **.NET 8/10** and **React**.
- Design and implement event-driven architectures utilizing **Kafka** and **RabbitMQ** for asynchronous processing, ensuring high throughput for corporate clients.
- Manage and deploy containerized microservices utilizing cloud infrastructure on **AWS (S3, EKS)** while ensuring system observability through Kibana.
- Pioneer the integration of AI tools, developing AI Agents and MCP servers to automate data analysis and enhance product capabilities.

Fullstack Developer

NTT DATA Business Solutions, Curitiba, BR – Remote

10/2023 – 10/2025

Core Responsibilities:

- Designed and implemented complex RESTful APIs and dynamic web interfaces using .NET Core and Angular, delivering reliable solutions for the electric utility sector.
- Spearheaded the migration of legacy on-premise systems to Azure Cloud (PaaS), successfully improving

- application scalability by 40%.
- ❑ Authored and maintained robust CI/CD pipelines in Azure DevOps and GitHub, significantly reducing deployment times and manual errors.

Fullstack Developer

Meta IT, São Paulo, BR – Remote

08/2022 - 10/2023

Core Responsibilities:

- ❑ Modernized critical enterprise systems from classic ASP.NET/VB6 to .NET 6/8, paired with modern React and Angular frontends for government clients.
- ❑ Championed software quality by implementing rigorous Test-Driven Development (TDD) using xUnit and MSTest, achieving 90%+ code coverage for secure financial modules.
- ❑ Ensured secure data handling and service integrations, strictly adhering to industry-standard compliance protocols.

.NET Developer

Grupo Telluria, São Sebastião do Paraíso, BR – **Hybrid**

09/2020 - 08/2022

Core Responsibilities:

- ❑ Developed robust backend microservices in .NET Core to handle complex third-party integrations with Salesforce and Zendesk.
- ❑ Orchestrated background tasks and automated data-syncing jobs utilizing Hangfire.
- ❑ Managed hybrid cloud environments and deployed applications utilizing Docker containers.

Software Developer

4T Sistemas | São Sebastião do Paraíso, BR - **On-site**

06/2019– 08/2020

- ❑ Supported, maintained, and optimized legacy systems built in VB6 and .NET MVC.
- ❑ Optimized complex database queries using SQL Server and Oracle PL/SQL, ensuring system stability.

EDUCATION

Bachelor's in Information Systems

Libertas Faculdades Integradas, Minas Gerais, Brazil

01/2016 – 12/2019

CERTIFICATIONS & TRAINING

.NET Core Microservices - The Complete Guide (.NET 8 MVC), Udemy

11/2023

Angular 9 - Essential, Cod3r

08/2023

Testing in .NET: Integrating the Application with a Database, Alura

03/2023

REST with ASP.NET Core WebAPI, desenvolvedor.io

11/2022

LANGUAGES

Portuguese: Native.

English: Advanced (C1).
